# Four-Leaf Clover Hunt

During this month's edition of Circuit Rider there will be four leaf clovers, like the one below, hidden throughout the paper. Other styles of clovers and the one below do not count. If you think you found them all, come to Mrs. Workman's room, room 314. The first three people to find all the four leaf clovers will get a prize.

# Why Gummy Bears are Kind of Gross

Were you aware that gelatin (what gummy bears are made out of) are made of animal cartilage, bones, and skin? Gummy bears don't sound too good now.

Other ingredients include, sugar, glucose syrup, citric acid, starch, and food coloring.

Now that you know what they're made of, will you keep eating them? My evidence:<sup>h</sup>

# Words Of The Month

**Gardyloo:** this is what people living in Edinburgh shouted out their windows as a warning before dumping their slop buckets out of their windows. At least they gave a little bit of a warning to those below!

*By: Jack Soloman*

**Gubbins:** This is an object that has little or no value and is also referring to a gadget or device. It can also refer to odds and ends or rubbish and, oddly enough, can be used to describe a silly person. We don't know about you, but it seems a little strange that a word describing something with little to no value also refers to someone who is silly.

# COFFEE!!!!

A lot of us drink coffee. I do! Coffee tastes **AMAZING**, but there are consequences to drinking it. I am definitely not saying you shouldn't drink it because I drink it often, but I am saying that you should know what it does to your body. Here is what it does:

1. Restlessness
2. Nervousness
3. Flushed Face
4. Muscle Twitching
5. Rambling Flow of Thought and Speech
6. Insomnia
7. Periods of Inexhaustibility
8. Excitement

If you ever experienced these then you should consider drinking less coffee.

# The Best Birds in the World

*Chickens are the heart of the food industry. I look at chickens a little bit more than other people do. They descended for the Red Junglefowl found in South-East Asia. Romans brought them when they conquered the world. That is how chickens got around. Charles Darwin used chickens in his studies about evolution and chickens look like famous people.*

# Why Yellow is the Best Color

Yellow is the best color because it is the color of happiness and it's a bright color that make people feel good.

It is also the color of emojis which show emotion. I would understand arguments when people may say blue, because it is the most popular color, but I believe yellow is the color of happiness so it's the best. (also because I said so)
